IntelliFlo™ VS+SVRS

Intelligent Variable Speed Pump + Safety Vacuum Release System

- * Meets ASME A112.19.17.2002 Standards
- * Onboard intelligence detects blockage and automatically shuts pump off within seconds
- * Exclusive breakthrough motor technology provides energy savings while being safety compliant
- * SVRS protection cannot be turned off
- * Safety lock-out feature (password protected) prevents pump speed settings from being changed by unauthorized personnel
- * NSF certified and UL and ETL Listed
- * 8 settable, changeable speeds ranging from 1100 to 3450 RPMs
- * No SVRS calibration required; the blockage detection/shut down function is pre-programmed
- * If the SVRS becomes disabled, the pump will not run

460934	54HP51574	Pentair Ultra Temp Heat Pump 140,000 140,000 BTU's Heat @ 80°	\$7,696.00

Standard Features

- * Digital control panel displays pool temperature and monitors operating status of the unit
- * Titanium Heat Exchanger not affected by aggressive water chemistry
- * Commercial grade Scroll type compressor
- * *Auto Heat* maintains pool temperature 24 hours a day, overriding the pool time clock

HEAT PUMP	.075 /Kwh	2093

WHY A HEAT PUMP?

- * Uses heat in the air
- * Delivers \$4-\$7 of heat for each \$1 of energy used
- * 500%-600% efficient vs. 80-85% for gas heaters
- * Very little maintenance
- * No gas lines to run
- * No LP tanks to buy
- * 15-20 year life
- * Safer---NO GAS!
- * No pilot lighting
- * Clean emissions
- * Odorless operation

HOW DOES IT WORK?

- * Uses Nature's warm air to heat liquid freon and turn it into gas
- * Warm gas compressed into *hot* gas
- * Hot gas flows into the heat exchanger & releases heat to flowing water

Thermo-Light----- Floating Spa Cover

For larger and free-form spa covers that can be too heavy or too big with the standard construction method. Using the finest marine grade vinyl and a special foam core, the Thermo-Light is made to last and not absorb water. Dimensions are to be the water's edge...it floats inside the pool/spa on the water.

A paint job is only as good as the surface preparation. You want it so clean you could "eat off of it".

Step #1---Clean the pool surface with #910 Pool Wash to break down oils and dirt left on the surface...
rinse...pump out the rinse water.

Step #2---Acid wash surface with a 2:1, water to muriatic acid...rinse...pump out acid solution carefully.

Step #3---Repeat Step #1...allow surface to dry and reach proper temperature before applying paint.

OR DO IT THE EASY WAY!

Step #1---Mix **PREP MAGIC** according to directions (**PREP MAGIC** + water)...apply to surface.

Step #2---Allow surface to dry and reach proper temperature before applying paint.

See page 59 for "**PREP MAGIC**"
